

# Aditya Mani Tripathi

AI Engineer

📍 Gorakhpur, Uttar Pradesh 📞 +91 9115383908 ✉ adiimanitripathi@gmail.com 🌐 LinkedIn

## PROFILE

### What sets me apart? I figure it out, I don't back off, and I always deliver

AI Engineer with 2+ years of experience shipping real-world ML, NLP, and LLM solutions. I've delivered full-stack AI projects end-to-end — from tackling brand-new use cases to optimizing prebuilt pipelines. Whether it meant learning a new framework overnight or debugging complex workflows under pressure, I've always pushed through and delivered results. I'm proficient across the AI/ML toolchain and comfortable working across the stack.

## SKILLS

**Data Science:** Python, Pandas, Scikit-Learn, Statistical Modeling, Hypothesis Testing, Regression Analysis, EDA, Machine Learning, NLP, Computer Vision, MLOps, Data Storytelling, A/B Testing, Deep Learning

**LLM:** Prompt Engineering, Generative AI, LLMs, LLM APIs, Fine-Tuning LLMs, LoRA, QLoRA, RAG, Embedding Models, LangChain, LLMops, Hugging Face, Conversational AI

**Data Management:** Google BigQuery, Watsonx Data, Vector Databases, MySQL and PostgreSQL

**Platforms:** Experienced in Linux, GitHub, Docker, GCP and AWS

## PROFESSIONAL EXPERIENCE

### Decision Foundry, AI Engineer

Oct 2025 – Present | Bengaluru, India

- Contributed to the **design and implementation of Generative AI (GenAI) solutions for market mix modeling (MMM)**—leveraging AI-driven feature engineering and scenario simulations to improve budget allocation insights and marketing effectiveness.
- Supported the development of **GenAI-powered elasticity modeling solutions**, enabling automated price elasticity estimation and demand sensitivity analysis across multiple products to inform pricing and promotional strategy.

### Brainlabs, Specialist Data Science

Oct 2024 – Oct 2025 | Bengaluru, India

- Contributed to the design and implementation of Generative AI (GenAI) solutions for two Fortune 500 clients** to optimize media planning and boost website SEO — automating content generation, keyword research, and on-page recommendations, resulting in an **83% improvement in processing time**.
- Built scalable AI pipelines using Google Cloud services (Vertex AI, Cloud Run, Compute Engine, BigQuery) to support dynamic media content generation and SEO analytics across global websites.
- Collaborated with cross-functional marketing, engineering, and data science teams to integrate GenAI tools into digital workflows—accelerating campaign planning, automating SEO reporting, and driving measurable improvements in search visibility and user engagement.

### Prescience DS, Associate ML Engineer

Aug 2024 – Oct 2024 | Bengaluru, India

- Optimized and stabilized a GenAI-powered Tutor Bot** for a leading **EdTech** enterprise by refining LLM integration, fixing broken workflows, and enhancing Agentic learning loops — resulting in over **50% improvement in content quality** and delivering scalable, personalized tutoring experiences to thousands of learners.

### Prescience DS, Data Science Intern

Jun 2023 – Jul 2024 | Bengaluru, India

- Optimized an OCR-based application for a global e-commerce client** to extract structured tabular data from images and convert it into Excel spreadsheets. Utilized Python libraries for accurate data parsing and transformation, streamlining data ingestion workflows, And processed 10K+ images with **>95% parsing accuracy**.
- Implemented Large Language Models (LLMs) in internal R&D projects**, including a financial chatbot that enabled natural language querying over public datasets. Leveraged Retrieval-Augmented Generation (RAG) techniques to build multi-purpose bots capable of handling sentiment analysis, NL-to-SQL conversion, and conversational interfaces over heterogeneous data sources — significantly enhancing user experience and information accessibility.

- **Contributed to MLOps for a global logistics client**, deploying and monitoring ML models in production using best practices in versioning, CI/CD, and performance tracking — ensuring stable, scalable integration within business-critical data pipelines.
- **Engineered a web scraper for internal analytics**, targeting social media platforms to extract data. Processed and cleaned the data to automatically generate **PDF-based analytical reports**, enhancing internal R&D team workflows.
- **Partnered with IBM's cross-functional team** to develop and deploy a RAG-based chatbot for financial document handling, leveraging **Watson tool suite**(Watson Studio, Watsonx Data Watson Assistant), and AWS services. Enabled secure, real-time retrieval of insights from complex financial data — **reducing manual lookup time to seconds** and achieving over **90% accuracy** in information extraction.

## PROJECTS

---

AI Chatbot with RAG Technique

Dec 2023 – Jan 2024

**Solely built an end-to-end RAG-based chatbot** capable of answering user queries from dynamic inputs including CSVs, PDFs, raw text, and URLs. Engineered backend support for web scraping and multi-format parsing, and integrated it with a Streamlit interface to enable real-time data uploads and natural language Q&A — making complex data lookup intuitive and accessible to non-technical users.

Malicious Websites Detection

Apr 2023 – May 2023

**Built a machine learning model to detect malicious URLs** using features such as domain age, URL structure, and character frequency patterns. Trained and evaluated the model using accuracy, precision, and recall metrics. Optimized for real-time scanning and containerized with Docker for scalable deployment in browsers and security tools — enhancing phishing and fraud detection capabilities.

Exploratory Data Analysis on Gaming Dataset

Nov 2022

**Performed EDA on a gaming dataset** using Python, Matplotlib, and Seaborn to uncover trends and correlations tied to game success. Extracted actionable insights to support strategic business decisions in the gaming domain.

## EDUCATION

---

Lovely Professional University,  
B.Tech in Computer Science with a specialization in Data Science

Aug 2020 – Jul 2024 | Phagwara, India

Saraswati Vidhya Mandir, Higher Secondary

Jul 2019 – Mar 2020 | Basti, India

## LANGUAGES

---

English

Hindi
